

FLEX CHANNEL TRIM

MEETING YOUR REQUIREMENTS FROM START TO FINISH

ABOUT US

SEM Specialty Products' (SEM SP) Flex Channel provides a resilient, compressible barrier between stationary and moving parts for maximum resistance to dust, air & water infiltration.

- Easier operation with Flex Channel in place
- Available in several widths to accept different types of sliding panels and frames
- Can be constructed to meet specific design and performance criteria

SEM SP window channel seals are used in **Marine, Automotive, RV, and Aeronautic** industries. SEM SP wire carriers covered with woven pile fabric create u-shaped channels that retain and seal sliding panels on linear surfaces. They are flexible to accommodate a tight radius and for maximum ease of operation.
