PILE SEALING & STRIPPING

ADHESIVE & RIGID BACKED PILE

ABOUT US

Located in Rochester, NY, USA SEM Specialty Products (SEM SP) has a long history of innovation and responsiveness to customer's needs. For over 50 years, SEM SP has developed and manufactured pile seals and weather stripping - providing an effective solution to sealing against dust, debris, noise, insects and filling gaps. Our pile products have been used extensively in the housing, construction, aerospace, automotive and RV industries, as well as other industrial and consumer uses. SEM SP manufactures pile in many heights, widths and lengths, along with incorporating various backings, including adhesive and extruded plastic and aluminum.

Adhesive Backed Pile:

Available with both standard or customer specified adhesives, SEM SP's adhesive backed woven pile is a versatile product for both original and aftermarket use in all end markets where sealing and weather stripping is required. SEM SP is happy to private label for pile customers.

Rigid Backed Pile:

SEM SP can provide plastic, aluminum and other integrated pile backing based on customer needs. The sample shown here is a pile seal on extruded aluminum with intermittent gaps as required by the end use.
