

WOVEN PILE PRODUCTS

MEETING YOUR REQUIREMENTS FROM START TO FINISH

ABOUT US

SEM Specialty Products' (SEM SP) woven pile provides customers a premium pile product as compared to non-woven alternatives on the market. The following represent just some of these features:

- Woven pile construction results in permanent bond between fibers and backing
- Products are very resilient and durable
- No pile pull out results in quick form recovery
- Superior bloom for better surface coverage and a pleasing aesthetic appearance
- Flexible from the base to help compensate for uneven surfaces
- Greater range of available pile heights typically ranging from 0.130" up to 0.650"
- Optional polypropylene backer to help with installation
- Optional T slot or surface mounting with an adhesive backed option
- Rapid recovery after insertion, handling, storage or fabrication

Additional Options:

- Base width can be slit to any desired width
- Unlimited variety of pile heights, densities, and colors
- Multiple yarn fiber options - if it is a fiber, we can weave it into a woven pile product
- Reduces frictional operating forces, air filtration & water penetration
- Can be supplied with optional fin for additional protection against the elements
